AWS · Azure · CI/CD · Docker · Git · IoT · Kafka · Python · Snowflake · SQL · Terraform

Summary

Platform and Data Engineer specialized in designing and deploying cloud-based data platforms built on modular, infrastructure-as-code architectures, making them easy to scale and govern. Proven track record in delivering end-to-end data pipelines, containerized services, and real-time analytics ecosystems for multinational organizations. Technical expertise spans Terraform-driven infrastructure, Docker deployments, Kafka streaming, Snowpark development, and advanced analytics tooling. My career has evolved across the full data spectrum — from visualizations and BI reporting to analytics, ETL, and ultimately platform engineering and architecture — giving me a holistic perspective reinforced by my background in business management.

Work Experience

Twoday - formerly Kaito

Helsinki, Finland

SENIOR CONSULTANT

Jan. 2022 - Current

- Data & Platform Engineer Sep. 2025 - Current
 - Development of custom solutions for different customers; Python integrations to ingest Azure SQL and API data with Snowflake as a the destination, update of Azure and Snowflake network configuration to use PrivateLink connectivity, and dbt development.
- Data & Platform Engineer at Metso Jun. 2023 - Sep. 2025
 - Deployed and managed Metso's brand new data platform based on Azure, Snowflake, and dbt, via Terraform; overseeing >2,800 resources, and ensuring consistent development pipelines, streamlined governance, and scalable, reliable operations. This included the initial migration of data from an existing platform based on Databricks.
 - Implemented end-to-end data ingestion from diverse sources—relational databases, Kafka streams, and REST APIs—into Snowflake, leveraging Snowpipe, external stages, and Snowpark Python code deployed as UDFs/UDTFs.
 - Configured and deployed Docker-based services to Azure Container Apps via GitHub Actions and Terraform, enabling repeatable, zero-downtime releases for Kafka Connect, Grafana, Apache Superset, and custom data-integration services.
- Platform Engineer at Ramirent Mar. 2023 - Jun. 2023
 - Deployed the foundations of Ramirent's brand new data platform based on Azure, Snowflake, and dbt, with all resources managed via Terraform and orchestrated via Azure DevOps pipelines.
- Platform Engineer at Kaito Insight Oy Feb. 2023 - Aug. 2024
 - Refactored Kaito's Terraform product-offering code into a modular and scalable architecture, improving the product's profitability by making it faster deploy, as well as easier to manage, govern, and onboard team members.

Qvantel

HEAD OF SOLUTION DESIGN

Apr. 2017 - Dec. 2022

- Head Of Solution Design Jun. 2022 - Dec. 2022.
 - Manage a geographically distributed team of experts across multiple domains and report directly to the Chief Product Officer; align team efforts to support R&D, product development, integrations, deliveries, operations, and sales; and handle responsibilities such as project management, R&D, and analysis of new product requirements.
- Business Intelligence Specialist Apr. 2018 - Jun. 2022
 - Engineered end-to-end real-time analytics solutions using Kafka and AWS, including infrastructure-as-code with Terraform and automated deployments via Jenkins; developed Python ETL ingestion functions on AWS Lambda streaming data to RDS; served as Tableau and QuickSight superuser creating and maintaining custom SQL queries, data sources, analyses, and dashboards; and built front-end components in JavaScript with React.
- Senior Business Analyst Apr. 2017 - Apr. 2018
 - Gathered reporting and analytics requirements and translated them into clear development specifications. Designed and developed JavaScript dashboards and reports to meet business needs. Built and maintained internal reporting solutions in Tableau.

Iggesund Paperboard / Holmen Group

Amsterdam, The Netherlands

MARKET INTELLIGENCE ANALYST

Sep. 2015 - Feb. 2017

- Served as BI superuser, supporting sales teams and top management through analysis, report creation, KPI dashboards, and ad hoc visualizations..
- Explored internal and external data using Excel, SQL, and R to provide insights across business functions, from sales to production.

UPM Kymmene

Tampere, Finland

CLOSING & REPORTING SPECIALIST

Dec. 2011 - Sep. 2013

- Managed financial and cost accounting period-end closing and reporting for the Brazilian, Italian, and Spanish units.
- Conducted performance analysis using SAP FICO, Hyperion, and Excel-based reports.
- Contributed to the SAP integration project for the Brazilian unit.

Kaito
